-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country, or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1- 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Gardner (UK patent application 2,134,885).

3. With respect to claim 1, Gardner shows a base (14), opposing sidewalls (9,10) extending upwardly from and substantially perpendicular to the base (14); and at least one partition (6) perpendicular to the side walls (9,10) and fitting securely against the sidewalls (9,10) to adjust the length and/or width of the container.

2. With respect to claim 2, Gardner shows opposing end walls (11,12) extending upwardly from and substantially perpendicular to the base (14).

4. With respect to claims 3,4, Gardner shows at least one partition (13) may be repositioned to adjust the interior length of said container.

5. With respect to claims 5,6 Gardner shows at least one partition (6) further comprises projections (4) located at or near the periphery of a set of opposing edges of the partition (6), the projections (4) serving to adjust the internal width of said container.

6. With respect to claim 7, Gardner shows a container where the capacity of container is at least 50 coverslips.

Art Unit: 3727

7. With respect to claim 8, Gardner shows a container where the capacity of container is at least 500 coverslips.
8. With respect to claim 9, Gardner shows a substantially flat plate (6) with projections (4) located at or near the periphery of a set of opposing edges of the partition (6), wherein the partition (6) is placed within a container for holding coverslips, and wherein the projections (4) serve to adjust the internal width of the container (fig. 1).

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 10&11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gardner (UK patent application 2,134,885).

Gardner discloses the invention substantially as claimed. However Gardner does not disclose the thickness of the projections.

It is common knowledge in the prior art to choose a thickness by the desired need.

11. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the thickness of each of the projections be approximately 1 mm or 2 mm in order to fit the desired object to go into the receptacle.

Art Unit: 3727

A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).
